

IFAPA TRAINING

for foster, adoptive and kinship parents and workers

The Effects of Disrupted Attachment on a Child's Brain, Heart and Future

We will explore how essential attachment is for healthy development of a child and what happens when that attachment does not occur or is disrupted. We will further examine how that affects a child throughout their life span and how it impacts the relationships, behaviors, and needs of the child and the child's caregivers. We will discuss ways to assess and rebuild healthier attachments no matter the age of the child.

Approved for 3 Hours of Foster Parent Credit

About the Trainer:

Kate Haberman, LISW, MFT, RPT

Kate has 15 years of experience working with children and families. Kate has expertise working with couples and families, sexuality, trauma and attachment and generational anxiety. After receiving her Masters in Social Work and Marriage and Family Therapy Certificate from UW-Milwaukee, Kate began providing individual, family and group therapy at Bremwood Residential Treatment Center and Midlowa Family Therapy. Kate then opened her own private practice and is now the co-owner and clinical director of Monarch Therapy Services and has recently launched a Trauma and Attachment Team program within the agency. Kate is a foster and adoptive parent and Vice President of the Allison Area Foster Parent Association Board of Directors. Kate has a 7 year old daughter (whom was adopted) and 2 year old twins.
