“Quirky Kids”: Practical Strategies for Living with Young Children with Challenging Behaviors

(3 hrs credit) - Adopted children and children in foster care often come to us with significant behavioral problems. These may include Attention Deficit Hyperactivity Disorder, aggressive behaviors towards others and/or other mental health problems. Parenting children with these issues can be challenging. This session is designed to provide foster and adoptive parents with information about challenging behaviors in young children and to help parents develop more successful parenting strategies.

Trainer: Dorothy Lifka, LISW

Dorothy Lifka is a licensed independent social worker. She has a Masters of Science from Wheelock Graduate School in Early Childhood Special Education, a Masters of Social Work from the University of Iowa, and a Doctorate in Education from the University of South Dakota. Dorothy has worked with children and families for more than thirty years as a teacher and therapist. She has been trained in dyadic therapy, attachment therapy, trauma focused cognitive behavioral therapy, and filial therapy and works from a trauma informed perspective. Dorothy has worked with culturally diverse populations. She is an adjunct instructor at Des Moines Community College and has also taught at Tufts University, Wheelock Graduate School and Western Iowa Technical Community College. She has taught classes for Child Care Resource and Referral and presented workshops and trainings on a variety of mental health topics.
